## FEATURES

### Integrated Riding Modes: Sport, Road, Rain, Rider (Manual)

All-inclusive modes that link S-KTRC and Power Mode allow riders to efficiently set traction control and power delivery to suit a given riding situation.

### Powerful 998 cm3 Liquid-Cooled, 4-Stroke In-Line Four

Updates to the Ninja ZX-10R's powerful engine offer cleaner emissions while maintaining the performance of its predecessor.

### Integrated Winglets

Winglets built into the upper cowl generate downforce that helps keep the front wheel on the ground during strong acceleration.

### High-Grade Suspension

More circuit-focused settings for the WSB-developed BFF (Balance Free Front Fork) and BFRC lite (Balance Free Rear Cushion) shock facilitate front-rear weight transfer, and contribute to light handling.

## Close-ratio Transmission

The Ninja ZX-10R's gear ratios were idealised for circuit riding. A larger rear sprocket (39T >> 41T) and shorter ratios for 1st, 2nd and 3rd gears offer strong low-mid range acceleration for quicker corner exits, as well as quicker off-the-line acceleration for strong launches onto the circuit.

## TFT Colour Instrumentation

The compact new all-digital TFT colour instrumentation gives the cockpit a high-tech, high-grade appearance. The new meter also offers additional features unavailable on the previous model.

## Aerodynamic Riding Position

Updated handlebar and footpeg positions contribute to a more aggressive, circuit-focused riding position, while a new seat design helps riders minimise drag when tucked behind the windshield going down the straight.

## Electronic Cruise Control

Kawasaki's cruise control system allows a desired speed to be maintained with the simple press of a button. Once activated, the rider does not have to constantly apply the throttle. This reduces stress on the right hand when traveling long distances, enabling relaxed cruising and contributing to a high level of riding comfort.

## Air-Cooled Oil Cooler

Based on feedback from Kawasaki's WSB race machine, the new air-cooled oil cooler features an independent circuit – a design often seen on highperformance models.
