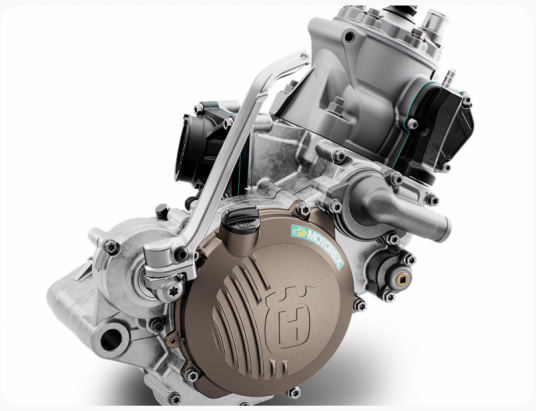
TC 125 2 STROKE FEATURES

ENGINE

With 40 hp, and an overall weight of just 17.2 kg, the TC 125 is at the pinnacle of performance in the competitive 125cc class. The lightweight engine is designed to provide abundant torque making the TC 125 easier to ride for both beginners and seasoned professionals. The TC 125 engine features shaft arrangements that centralize rotating mass for optimal operation with the chassis, resulting in a light and agile handling feel.



CHROMIUM MOLYBDENUM FRAME

The chromium-molybdenum steel frame harnesses advanced geometries and flex characteristics aimed at providing unparalleled rider feedback, energy absorption and exceptional straight-line stability. The frame is finished off in a premium blue powder coating with standard frame protectors for superior protection and durability.

GEARBOX

The 6-speed gearbox is manufactured exclusively by PANKL Racing Systems and ensures the highest level of durability and reliability. The gearbox features specific motocross gearing, while the gear lever features an innovative tip design that prevents dirt build-up.

HIGH TECH PRODUCTION PROCESSES

High-pressure die cast production processes keep the overall engine weight to a minimum, resulting in a thinner, but overall stronger, engine casing. On the frame side, hydroforming, laser-cutting and robot welding merge quality materials and advanced manufacturing techniques, while an innovative carbon composite subframe features supreme strength at minimal weight.
