NINJA 500 SE EX500 FEATURES

Assist & Slipper Clutch

Kawasaki's Assist & Slipper Clutch results in a light clutch pull for even more rider-friendly and manageable riding in everyday situations, and reduced skipping and hopping from the rear for better sport riding and added confidence.

Instrumentation with Smartphone Connectivity

Both the full LCD instrument panel on the standard models and the TFT display on the SE models offer smartphone connectivity, enabling riders to connect with their machines to enjoy display notifications, riding logs, and community features.

Confidence-Inspiring Reach to the Ground

While seat height is 785 mm, the slim design of both the seat and the rear of the engine gives riders an unobstructed line for their feet to reach the ground. The seat's flat shape offers ample padding in the front portion without sacrificing the comfortable reach to the ground, which helps riders enjoy the bike with confidence.

High-Class, Intense Design

No matter from what angle the Ninja 500 is seen, its distinctive front face and sleek, flowing lines make it clear that this is a member of the Ninja family, with race-inspired, big-bike looks. The shape of the full-fairing bodywork fosters a sense of unity with the rider, helping them feel at one with the bike.
